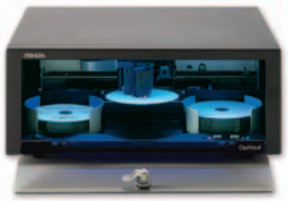
"I had no idea that our company emails were not being archived."

It's hard to believe, but most companies can't retrieve their employee's emails when required to do so by an attorney or a regulatory agency. That's a really big problem. You could lose a lawsuit. Or get fined. The costs can be staggering.



Protect Yourself with OptiVault™

Primera's new OptiVault Archival Appliance attaches easily to your Microsoft® Exchange® servers. It automatically backs-up every email sent and received so that you can quickly find them when needed. It's powered by EMC Dantz® Retrospect® – the world's most highly acclaimed backup and recovery software.

OptiVault uses archival-grade Write Once Read Many (WORM) media. So you'll also comply with Sarbanes-Oxley and other recent data retention laws.
